

Uralkali—Nourishing the Earth

INVESTOR PRESENTATION

July 2010

Disclaimer

This presentation has been prepared by JSC Uralkali (the «Company»). By attending the meeting where the presentation is made, or by reading the presentation slides, you agree to the following limitations and notifications.

With respect to any information communicated by the Company, its agents or its representatives (including its directors, officers, employees, members, attorneys, advisors and any affiliates) to you or your agents or representatives (including any directors, officers, employees, members, attorneys, advisors and affiliates), directly or indirectly, whether in written, oral, visual, electronic or any other form, during or constituting the whole or part of this presentation or any presentation meeting or any conversation or discussion relating to or held in connection with this presentation, or any opinion expressed in respect of such information (the «Information»), such Information may not be reproduced, redistributed, passed on or otherwise disseminated to any other person, directly or indirectly, whether in written, oral, visual, electronic or any other form, for any purpose.

The Information communicated does not constitute or form part of, and should not be construed as, an offer, solicitation or invitation to subscribe for, underwrite or otherwise acquire, any securities of the Company or any member of its group nor should it or any part of it form the basis of, or be relied on in connection with, any contract to purchase or subscribe for any securities of the Company or any member of its group, nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever. Any person considering the purchase of any securities of the Company or any member of its group must inform himself or herself independently before taking any investment decision. The Information communicated has been provided to you solely for your information and background and is subject to amendment. Further, the Information communicated has been compiled on the basis of information from a number of sources and reflects prevailing conditions as of its date, which are subject to change. The medium through which the Information is communicated constitutes neither an advertisement nor a prospectus. The Information communicated has not been independently verified. The Information communicated is subject to verification and amendment without notice and the Company is not under any obligation to update or keep current the Information.

Accordingly, no representation or warranty, express or implied, is made or given by or on behalf of the Company or any of its directors, officers, employees, members, attorneys, advisors, affiliates or any other person as to the correctness, accuracy, currency, completeness, adequacy, usefulness, reliability, fairness or otherwise of the Information communicated, and any reliance you place on such Information will be at your sole risk. Neither the Company nor any of its directors, officers, employees, members, attorneys, advisors, affiliates or any other person accepts any liability whatsoever for any loss howsoever arising from any use of the Information communicated.

To the fullest extent permitted by applicable law, the Company shall not be liable for any compensatory, punitive, special, consequential or other damages, any loss of income or revenue, any loss of business, any loss of anticipated savings, any loss of goodwill, or any other losses, liabilities, expenses or costs of whatever nature arising from or attributable to your access to, or inability to access, or reliance on Information even if the Company has been advised of the possibility of such damages, losses, liabilities, expenses or costs.

Some of the Information may constitute projections or other forward-looking statements regarding future events or the future financial performance of the Company. These statements involve numerous assumptions regarding the present and future strategies of the Company and the environment in which it operates and will operate in the future and involve a number of known and unknown risks and other factors that could cause the Company's or its industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Accordingly, the Company provides no assurance whatsoever that its or its industry's actual results, levels of activity, performance or achievements will be consistent with the future results, levels of activity, performance or achievements expressed or implied by such forward looking statements. Neither the Company nor any of its directors, officers, employees, members, attorneys, advisors, affiliates or any other person intends or has any duty or obligation to supplement, amend, update or revise any of the forward-looking statements contained herein to reflect any change in the Company's expectations with regard thereto or any change in events, conditions or circumstances on which any such statements are based.

Multiple factors could cause the actual results to differ materially from those contained in any projections or forward-looking statements, including, among others, potential fluctuations in quarterly or other results, dependence on new product development, rapid technological and market change, acquisition strategy, manufacturing risks, volatility of stock price, financial risk management, future growth subject to risks of political instability, economic growth and natural disasters, wars and acts of terrorism.

Agenda

- **Potash Market Outlook**
- **Operating update**
- **FY 2009 Financial Results**

Potassium: One of the Three Primary Nutrients

Nitrogen (N)

- Promotes protein formation
- Determines plant's growth, vigour, colour and yield

Phosphorus (P)

- Plays a key role in adequate root development and photosynthesis process
- Helps plant resist drought

Potassium (K)

- Improves plant durability and resistance to drought, disease, weeds, parasites and cold weather

Potash: Growth, Visibility, Stability

	Potash (K)	Phosphate (P)	Nitrogen (N)
Market size ¹ (2010E)	25.5 million tonnes K₂O² (43 million tonnes KCl)	38.3 million tonnes (P2 O5)	102.9 million tonnes (N)
Geographic availability	Very limited	Limited	Readily available
Industry members	Small number of leading players	Several leading players	Large number of players
Long-term pricing stability	High	Medium	Low
Profitability	High	Low/medium	Low/medium
Barriers to entry	High	Medium	Low
Cost of greenfield capacity	US\$2.8bn for 2 mln tonnes (KCl)	US\$1.5bn for 1 mln tonnes (P2 O5)	US\$1bn for 1 mln tonnes (NH ₃)
Greenfield development time	min 7 years	~ 3-4 years	~ 3 years

Potash represents the strongest investment story across the fertilizer industry

Source: Fertecon, Uralkali, PotashCorp, IFA

Notes:

1. Including fertilizer consumption
2. 1t KCl (product) is equal to 1.67t K₂O (nutrient)

Strong Industry Fundamentals

Source: Uralkali

Mineral Scarcity Means High Entry Barriers

Proven resources of potash are largely concentrated in Canada and Russia¹

Source: ERCOSPLAN, IFA, FERTCON, CRU, USG, Canadian GS, 2008

Notes:

1. Other countries, not represented on the map, account for less than 2.0% of total resources

Limited access to resources, few high quality ore deposits

Higher Yields Required to Feed Rising Population

Growing population Needs Higher Crop Yields

Source: FAO

Arable land per capita is shrinking

Source: FAO

World income growth, %

Source: Economist Intelligence Unit

Food consumption is increasing

Source: FAO

Changing Diets Drive Demand for Grain

Global Grain Yield Requirements are Growing

Source: RBC Capital Markets

Global Grain Stock-to-Use Ratio is Still Below Average

Source: RBC Capital Markets, USDA

Developing countries have a big portion of total crop acreage

Source: USDA

...though have lower yields compared to developed agricultures

Source: USDA

Potash Industry Snapshot

Price performance reflects supply/demand dynamics

Source: Fertecon

Global capacity built decades ago

Source: Macquarie Research

KCI production by major potash producers

Source: British Sulphur Consultants

Product mix by key potash players

Net sales breakdown by product, 2009 (US\$m)

Source: Companies reports, Uralkali financial information prepared in accordance with IFRS

Notes:

1. Gross sales numbers

2. Based on Bloomberg consensus forecast for 2009

2009: Activity in The Global Potash Market Slowed Significantly

Global potash sales fell 43% in 2009

Imports to all major markets fell sharply in 2009

Potash industry hit hardest by lower capacity utilization

- Worldwide volumes were weak. Customers remained cautious, resulting in an unprecedented decline in potash sales
- The industry's average operating rates plunged to 52% of effective capacity due to depressed sales levels
- Settlements with China and India, the largest contract markets for potash, were delayed
- Shipments to spot markets slowed significantly

2009 Potash Prices Remained Relatively Firm vs. Other Fertilizers

2009 Potash Prices Remained Relatively Firm vs. Other Fertilizers

Source: FMB

Ag Commodity Prices to Fertilizer Prices (base 100=Jan 1995)

Source: IFA

- Potash prices remained well above historical levels, in spite of an unprecedented contraction in demand
- Potash maintains the best fundamental outlook of the three fertilizer nutrients because:
 - it has substantial barriers to entry due to high capital costs and long lead times for greenfield capacity
 - and the fact that potash reserves are only located in a few regions

BPC Shaped the Market in 2009

Source: FMB, Fertecon, Companies' announcements

- BPC shaped the market in 2009 by bringing potash price in line with farmers' economic reality
- The BPC contract agreement with China looks to have set a price floor for the global potash market

BPC Strategy Sustained Market Share

2008

Source: IFA, Companies' reports

2009

Source: IFA, Companies' reports, BPC

- In 2009, one of BPC's toughest challenges was to maintain its market share amidst a sharp fall in the potash market and aggressive pricing by smaller suppliers in major import markets
- By responding quickly to this challenge in key import markets BPC was able to avoid a substantial fall in its market share

Notes:

1. Together with Uralkali Trading S.A.

Market is Recovering, We are Well Positioned

World potash sales in 2010 are projected to rebound firmly

Massive destocking throughout 2009 brought year-end stocks to a very low level

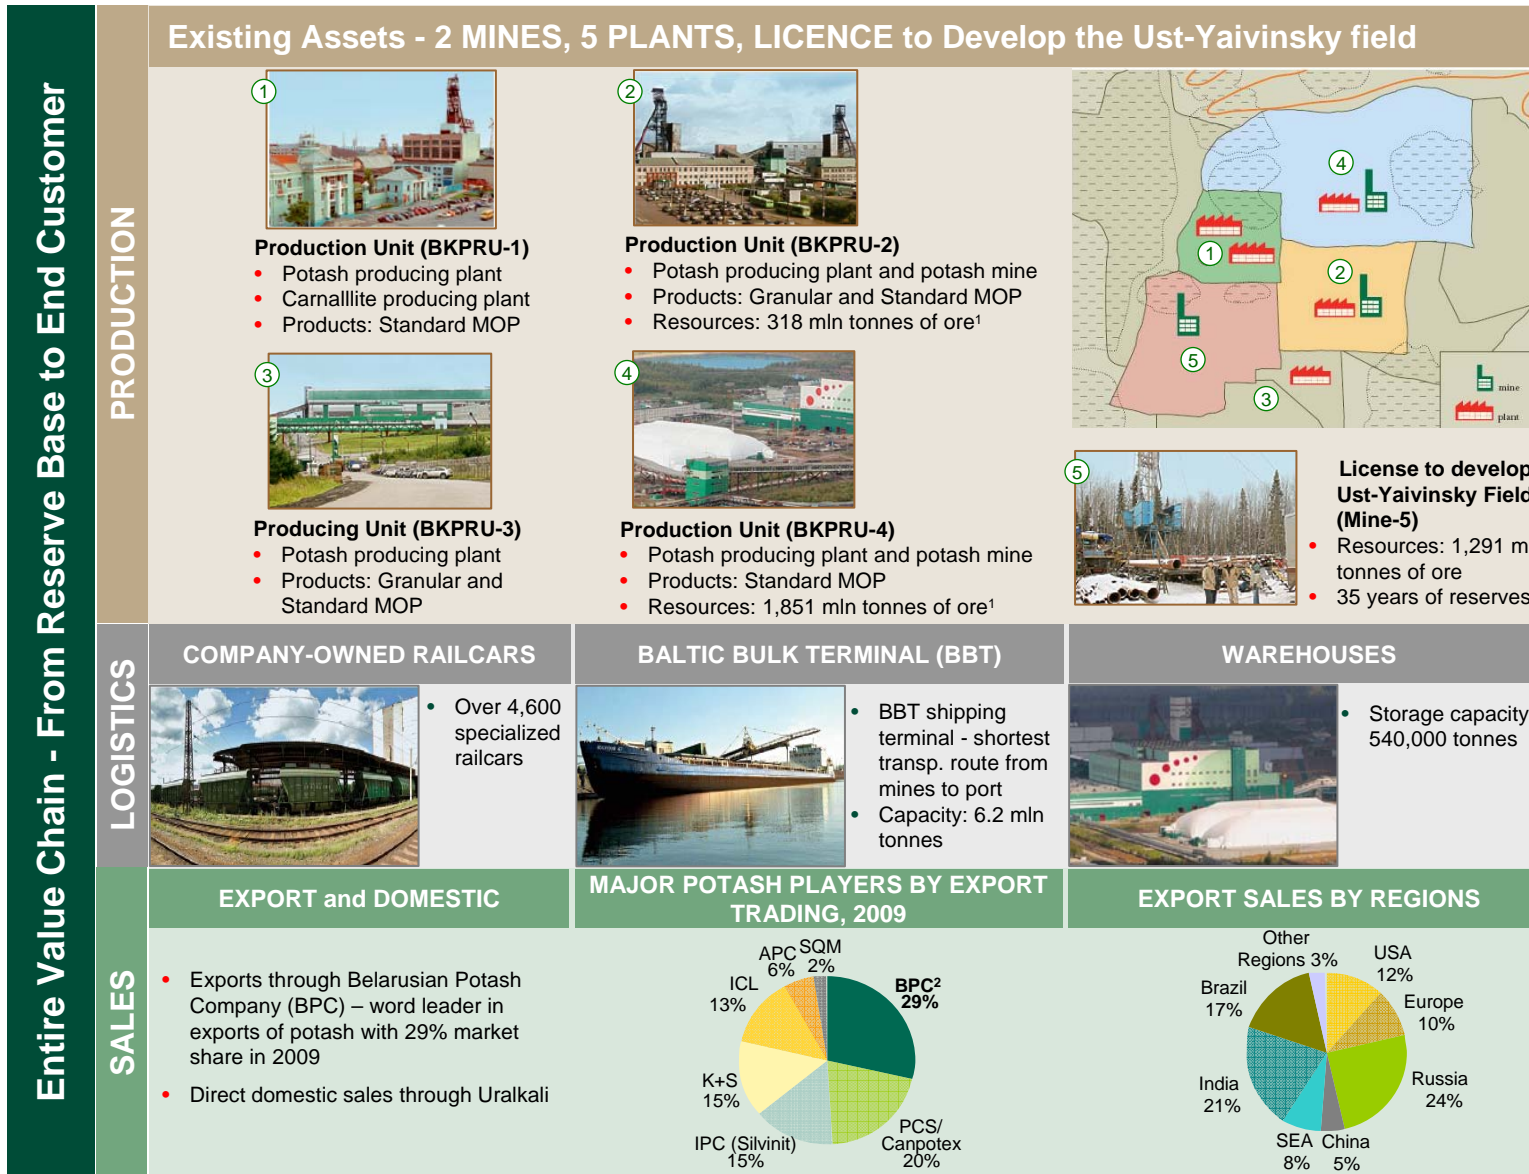

Source: IFA, BPC estimates

Agenda

- Potash Market Outlook
- Operating update
- FY 2009 Financial Results

Group Structure

Notes

- JORC as of January 1, 2010
- Together with Uralkali Trading S.A.

Well-Positioned to Meet Market Recovery

- **In addition to the 27% capacity expansion planned for 2012, Uralkali has an option for further long-term expansion at Mine-5**
- **Mine-5 key milestones:**
 - 2011 – preparation and approval of the mine construction design documentation
 - 2018 – reaching full capacity of the mine
 - Processing capacity - decision to be taken once potash market recovers and necessary approvals are granted

Agenda

- Potash Market Outlook
- Operating update
- **FY 2009 Financial Results**

2009 – Key Highlights

IFRS Financial Results

(RUR mln)	2008	2009	Change, %
Production (Million tonnes)	4.8	2.6	-45%
Sales (Million tonnes)	4.7	2.5	-47%
<i>% of domestic sales</i>	11%	24%	
Gross sales	62,798	33,809	-46%
Net Sales ¹	54,355	29,314	-46%
Mine flooding costs (net of depreciation charge)	8,286	1,060	-87%
EBITDA ² adjusted	41,349	16,375	-60%
<i>Margin³</i>	76%	56%	
Net Profit	21,943	9,095	-59%
Operating Cash Flow	32,604	4,472	-86%
Capex	14,341	14,105	-2%
Expan/Mainten. proportion	53/47	47/53	
Debt	13,987	13,463	-4%
Cash	16,174	4,297	-73%
Net Cash/(Debt) ⁴	2,187	-9,166	
Dividend Payout Ratio	39%		

Notes:

1. Based on adjusted sales (sales net of freight, railway tariff and shipping costs)
2. Adjusted EBITDA is calculated as Operating Profit plus depreciation and amortization and does not include mine flooding costs
3. EBITDA Margin is calculated as EBITDA divided by Net Sales
4. Net cash position is calculated as cash and cash equivalents (including deposits) minus bank loans

Key Considerations

- The decrease in export sales and production in 2009, and the increase in the proportion of domestic sales, was caused by lower potash demand in export markets

Costs

Cash COGS

Cash COGS¹ structure (2009)

- Low cost producer within potash industry
- Fixed vs. variable cash COGS structure 60/40² is preferable to production volume growth
- Potash Cash COGS³ 2009 – 70US\$ per tonne vs. 58US\$ per tonne in 2008
- Favourable effect of RUR devaluation
- Abnormal period due to production cut >50% in 2009

Notes:

1. Cost of goods sold less depreciation
2. For 100% utilization rate. Actual utilization rate in 2009 was app. 50% and actual COGS structure was 80/20
3. Total cost of sales for potash sales (Note 7. Segment reporting) less depreciation in COGS (Note 14). Depreciation is divided proportionally btw. Potash and Other sales. (Cash COGS 2009 – 80US\$ per tonne vs. 65US\$ per tonne in 2008)

Distribution costs

Distribution costs structure

Effective freight rates⁴

SPb railway tariff⁵

China railway tariff⁵

Notes:

4. Effective freight rates are calculated as freight cost divided by freight volumes
5. Effective railway tariff includes both loaded and empty railcars fares

Cost Cutting Programmes

Productivity Increase

As % of cash COGS

As % of cash G&A¹

Headcount, (period average)

Potash sector labour rates (2009)

- Low labour cost compared to other potash producers
- Target – 6,000 employees in main production unit

Source: Uralkali, British Sulphur Consultants

Notes:

1. General and administrative expenses less depreciation and amortization

Power Generation Programme

Fuel and energy costs 2009

Gas tariff³

Effective electricity tariff³

- License for parallel operation of the turbines expected in mid 2010
- After full implementation, expected efficiency gain is 50 RUR per tonne of potash production⁴

Notes:

3. Average natural gas and electricity prices charged in 2009 to final industrial consumers in UK, Germany and Spain per www.epp.eurostat.ec.europa.eu, converted to RUR at a US\$/RUR exchange rate of 31.75

4. We see the effect of the programme as the difference between the costs of purchased electricity and the cash costs of generated electricity, based on the assumptions that the company will operate at full capacity and the price increase will be 25% and 15% for gas, and 11% and 12% for electricity in 2010 and 2011 respectively

Capex and Cash Flow

Capex

Expansion CAPEX structure 2009

CAPEX Evolution

Cash Flow

Oper. Cash Flow vs. CAPEX

Dividends Payout Ratio

- 2009 Capex split ~ 50/50 expansion/maintenance
- 8.8 bln RUR – total amount of compensation related to Mine-1 flooding (2.3 bln RUR paid in April 2009, 5.5 bln RUR in December 2009, 1 bln RUR is expected to be paid in 2010)
- More than 95% of bank loans are in US\$, with an average interest rate of app. 2.49%

	2008 (US\$ mln)	2009 (US\$ mln)
Debt (bank loans)	476	445
Cash	551	142
Net Cash (Debt)	74	(303)

Notes:

1. Operating Cash Flow for 2009 was adjusted for the amount of compensations related to Mine-1 flooding, paid in 2009 (7.8 bln RUR)

Superior Top Line Growth and Profitability

Sustainable superior financial performance

Source: Relevant company reports, Uralkali audited IFRS financial statements

Note:

1. Based on gross sales for Silvinit, Arab Potash, Yara and SQM
2. Financial data for Mosaic is based on financial years ended May 2004, May 2008 and May 2009
3. Financial data for Silvinit is based on Bloomberg consensus forecast

Uralkali Shareholder Structure¹

- **Becounioco Holdings Ltd (Mr. Galchev)**
- **Aerellia Investments Ltd (Mr. Nesis)**
- **Kaliha Finance Ltd (Mr. Kerimov)**
- **Madura Holding Ltd (Mr. Rybolovlev)**
- **The Bank of New York (LSE)**
- **Legal entities and individuals (RTS, MICEX, others)**

Total number of shares - 2,124,390,000
 Equivalent of 424,878,000 GDRs
